BEAUTIFUL GIRL AS A TRAMP. She Will Write a Book About Her Experiences as a Hobo.

Friends of Susan Shelley, otherwise knewn as the woman hobo, the pretty and accomplished daughter of Mr. and Mrs. Jere Shelley, of York Springs, Pa., say that the young woman will shortly return to her home, and that she will devote the winter months to writing a book of her adventures in the realm of

Miss Shelley, who is but twenty-one s of age, is now in Chicago. She for some time been traveling ough the western States in male attire, and has caused the police and de-tective forces of several of the largest western cities a great deal of trouble, western cities a great deal of trouble. But for the publicity given her for wearing male attire and playing hobo, her York Spring friends and acquaint-ances would only think of her as the

pretty and accomplished singer and pretty and accompassed singer and planist who left that village over a year ago. Since leaving her home she has been found in men's clothes and pos-ing as a hobo, next as a homeless girl, seeking work; then as a detective, and after that as a traveler in search of experience in order to write a book.

Her chief delight seems to have been to fool the police, and in this she was most successful. Dressed in ragged trousers, blue flannel shirt and threadbare coat, she would slouch into a town with the profest hope gaft, and there

with the typical hobe galt, and there levy upon the citizens for food, clothing, and money in the tramp style. She delighted in having the police on her trail, and seemed to get great enjoyment out of their peremptory orders to move on to another town.

Her case was at last placed in the hands of ex-Mayor M. C. Erby, of Harrisburg, who succeeded in finding out the identity of the girl, who says that she has done nothing wrong.

# Using Both Hands.

The mother who deprecates the awkward appearance of the left-handed child may take courage from the fact hat ambidexterity is now considered of enormous benefit to all manual workers, says the Detroit Free Press. This from their ability to hands with equal facility. When Rus-kin was appealed to by Baden-Powell's er, asking what she should do to keep the child from using his left hand, he advised her to encourage the use of both hands. Dr. E. N. Smith, of the London Orthopedic hospital, in a reentarticle, makes a strong plea for the able adoption of a system teaching mbifexterity to children as a part of their regular school work.

# Fonlards.

Foulards bob up as serenely as ever the tide of spring fashions which is ding the shops with new and beauti-displays of vernal fabrics that tempt

which swayed feminine hearts and pompadour, as of old, parts reluctantly fashions last season are still the favorites in the list of twilled and satin foulards for the coming spring. A white or a pale gray ground with green or violet figures is also a very stylish com-

The figures are mainly bizarre scrolis and conventional flowers. Stripes are only used as a connection between the dashing curves and swirling figures which cover the surface of the silk. There are almost no purely floral designs seen except large conventional ized flowers which cast poster girls and their sinuous curves into a dim shadow.

#### Too Serious.

Women are not folly enough. They make too serious a business of life and laugh at its little humors too seldom. Men can stop in the midst of perplexi-ties and have a hearty laugh and i keeps them young. Women cannot and that is one reason why they fade early. Worry not only wrinkles the face, but it wrinkles and withers the mind.

#### Freezing Pies.

Many good housekeepers continue the somewhat old-fashioned practice of freezing mince pies, considering that thereby the flavor and excellence are much increased. It was something of a surprise, however, to discover recently a very up-to-date housekeeper putting her apple ples on a ledge outside of her dining room window, protected from the floating specks by a screen, for the purpose of freezing them. In reply to asconishment expressed, it was asserted that the freezing process was even more beneficial to apple pies than to those

### Pretty Coats of Panne Velvet.

Stunning coats are made of panne in different colors, and finished around the edge with a narrow stitched band of taffeta silk of the same color and one row of narrow gilt braid sewn on where the edges join. One especially dainty coat is made of white corded silk inset at intervals with a lace motif finishe around the edge with a fine white silk cord. It is lined with pink silk, which shows daintily through the lace and is finished on the edge with a narrow stitched band of the pink taffeta.

Date puffs are a dainty dessert, liked by children and by no means despised by their elders. They require two eggs, one cup of sugar, one quarter of a cup of butter, the same of milk, one tea-spoonful of baking power, and flour enough to make a thin batter. Stir in one cupful of stoned dates; fill muffin cups half full, and steam thirty min-Serve with a liquid sauce or with sweetened cream.

### Artistic Expedient.

A woman who has more artistic ideas than money for their execution has added greatly to the attractiveness of her drawing room by the exercise of a little ingenuity. When she moved into her new quarters she insisted that the place be termed an "apartment," and "apartment" it became. Furthermore, she was to have no "front room," but a drawing room. She bought some matting and had it tacked on the walls, not the floor. She had the janitor stain and polish the floor, and she threw a rugs about. She had the hideous and heavy chandelier removed and a single lantern substituted. She dec-orated the walls with Japanese prints,

effectively, if cheaply, framed.

Then she turned her attention to the couches. She affirmed, with much earn-estness, that no chair should ever enter that room. She sent around to the nearest dry goods store, and for a few cents became owner of a plain pine box. six feet long, thirty-two inches wide and fifteen inches high. She had hinges put on this side, and she filled the box with a lot of things she couldn't find room for elsewhere.
On the top of the box she placed a

and over it fastened a chentile curtain of attractive pattern. Then she made her friends make some cushions for her, and that couch was a thing of beauty, of utility and of cheapness. It was a delight to recline on its comforting surface, and it set off the apartment admirably.

But yet another couch was needed. and this time the inventive woman utilized a couple of steamer trunks, reminders of a more prosperous past. They were of the same height, but of different lengths, but this latter consideration was no objection. A cotton pad placed on top, and over this was thrown a handsome Bagdad curtain.

# As to Dressing the Hair.

With the flat hats and low turbans now in vogue a change in hairdressing became necessary, and the coiffure has receded from the extreme top and front of the head to the back. A charming arrangement has the hair waved softly all around, parted at the side and coiled loosely in two figure eights, held toge-ther by jeweled comes. The Catogan braid also is seen. This old-fashioned coiffure is made by tying the hair just below the crown and forming two braids that are looped up to the tying and fastended there. This leaves four lines of braided hair, which are flattened to the head and caught by pins, and fin-ished with a fancy comb. If the loops of the hair extend beyond the nape the neck, so much the more fashionable is the wearer. The front of the hair should be parted off and waved and fas-

are such displays of vernal fabrics that tempt wen short pocketbooks to stretch a littend under the knot. It seems quite certain that low and elaborate hairdressing, with many curls and braids, will take the place of the styles that have prevailed so long. The Dept.

by day and cannot last into the summer.

#### A New Kind of Wardrobe.

A woman who wished to turn a closetless room of her apartment into a sleeping room for her young son, and one which would sill be a den in which he could receive his special chums, hunted among the second-hand shops until she found a wardrobe such as the fashionable dressmaker has in her showroom. This had sliding doors, and was altogether too large for the space for which its new owner intended it. However, the aid of a clever carpenter was called in, and the wardrobe was soon reduced to twenty-three inches in depth, sixty in height, and the same in length. A broad shelf was fitted in, ten inches from the top, in which the trousers could be laid at full length. low this shelf was a pole from which the coats, fitted with coat hangers, were to be suspended, while the floor was to serve as the repository for numerous pairs of shoes. When the wardrobe was closed it looked like a very deep book. case, an illusion furthered by placing on the broad shelf at the top plaster casts and a few photographs.

### Manicuring.

Manicuring methods change from time to time. The old way of gouging and snipping the cuticle and torturing the nerves passed out of existence several years ago, and the new French method-which is gentleness and daintiness itself—has taken the place of the more barbarous and painful manner of hand-beautifyins, says the Phila-delphia Press. To do the work thoroughly and effectively, a set of six instruments is necessary. There is the steel file, the beveling file of sandpaper and orange wood stick, seissors, polishers and cuticule knife. The professional adds to these a little cushion on which to rest her patron's hand, a bowl of water, a bottle of bleach for removing stains, and two small boxes or jars containing rouge and polishing powder. These are arranged on a table over which has been thrown a clean

white towel.
Cutting the nails makes them very brittle, and that is why the file is preferred for shaping and trimming. But when the nails are very long filing is an endless and nervous task, best avoided by using the scissors, following with a quick smoothing with the file. If the file is used every day, or every other day, as it should be, trimming with the scissors will not be nec essary. When filing always go from the side toward the center. Avoid filing deeply into the sides of the nail, as this will make it broad. By givthe correct shape, the natl will be considerably affected and will grow accordingly.

### Correcting Others' Faults.

The higher courts of one of our neighboring States has been called upon to pass upon an important domestic question and decide to what extent, and for what offenses of omission and commission, a man may beat his wife. the case in point a wealthy farmer was convicted of having severely chastised his spouse because she could not see a squirrel he was trying to point out to her in a tree. He justified his conduct by quoting Scripture to prove his au thority, and furthermore urged in palliation of his deed that he was merely trying to correct some of his wife's faults.

In the present state of society the wife-beater gets but scant mercy from his more humane fellow-creatures, although there are undoubtedly many women who are what Jerry Cruncher called "aggervators," and there are cases when the badgered husband of an unreasonable wife may well agree with the hero of a popular comedy that while a man is a brute who strikes a while a man is a brute who strikes a woman, there are times when you feel meeting of all the students and teachlike it would be the treat of the son to give her a good spanking. Neither may a man who points out a thing to a woman who can't see it be said to be provocation. altogether lacking in Which of us is not guilty in this way, in desire at least? Did you ever tell a joke to a dull person and have it fall flat, without wishing you could pound a little humor into their heads? Did you ever know a silly person making the same old mistakes and failures year after year without wishing they could have some sense beaten into them?

The principal interest this case has, however, for most of us, is to call at-tention once more to the folly of married people trying to correct each other's faults. Matrimony is not, as far too many people seem to think, a re-formatory. The voice that breathed o'er Eden was not the voice of the schoolmistress or schoolmaster calling attention to one's lapses in grammar, or use of slang, or the way one eats soup, or wears one's collars. Still less is it a daily and hourly reminder of the things one ought to do and doesn't do, and does do and ought not to. It is all very well for those of our own household to say that they tell us of our faults because they love us, and be-cause strangers will not. We escape cause strangers will not. We escape the very first opportunity away from the unpleasant truth-teller to those who are less veracious and more agree-

No one knows the unbearable torture one undergoes from piles unless they are so filleted. TABLER'S BUCKEYE PILE OINTMENT is a quick, safe and painless cure. Price, 50 cents in bottles, Tubes, 75 cents. Z. C. M. I. Drug

# L. D. S. COLLEGE.

A male chorus will shortly be organized under the direction of Prof. Glies. A meeting for the purpose of organizing was held on Thursday

Invitations are out for the third college dancing party. It will be given at Christensen's on March 8, and is under the management of the Rho Betta Pi

Another large crowd of M. I. A. workers listened to Prof. Mills' lecture last Monday evening. He will speak again on Monday evening next at 8 o'clock at the new college building.

Several new students registered this week, principally in the business de-partment. Already the new building is too small to accommodate this rapidly growing part of the college.

The '04 class gave a peanut festival The Wednesday morning exercises and dancing party at the Social Hall cinated. He believes that vaccination is were of more than ordinary interest last Tuesday evening. There was a of very great benefit, but did not be-

The college girls scored another vic

tory on Thursday, in a game of basket-ball. They evidently play as if they hope that the promised prize will be given, and that they will be the winners. This is the proper attitude.

Prof. Mutch spoke to the general as sembly on Wednesday morning on the subject "Moral Basis of Mental Life." lecture was very instructive and was highly appreciated by all. There were many visitors present.

The new speed classes in typewriting are doing some very remarkable work. These students all began at the fail opening of the college, and are taking other branches, including shorthand which requires an enormous amount of study. Yet all wrote at a rate of 60 to 65 words per minute, and one reached the rate of 70 words without an error. It was unfamiliar matter,

Lake county; Mr. Robinson, a promin ent business man of Tooele; Mr. L. Holbrook, manager of the Grand Central mine, and Mr. Judges, head bookkeeper in Z. C. M. I. The last named gentleman remarked that he did not see how any course could be nearer to actual business as done in business houses than the work done at the college,

## B. Y. ACADEMY.

Provo City, Feb. 27 .- The next liter- M. ary program will be in a new line. English B- has challenged the school for spelling match to come off next Saturday night.

Prof. Lund will give a concert next Friday night, in which some noted artists will take part,

Yesterday afternoon a mass meeting was called to fill the vacancies in the officers of the Athletic association. Enthusiasm and good will prevailed and a good election was made.

President Brimhall addressed Parent's class tonight, his subject being "Girlhood." With a masterly hand he laid before the class the wonders beauty of this important period to woman's life. His remarks were ap-

Washington's birthday was celebratwith a very patrote program, which was given during the regular theological hour. The meeting closed with the song so dear to all, "America As the district schools were closed a great number of visitors were present,

most of them being old students. Not the least of the influences that shape the destinies in the lives of the students are the occasional morning talks given by President Brimhall. The one delivered Thursday morning on moral conduct was listened to with breathless attention for three quarters of an hour. His words searched every heart as perhaps they had never been searched before.

President Smith's talk in Parent's class last Thursday night on "The Influence of the Mother in the Home" was of thrilling interest. It is seldom that any person has such a rich store of experience in this line as President Smith and it is certain that no one make the subject more impressive and interesting.

Memorial services in honor of Dr Maeser were held last Sunday in the Stake tabernacie under the auspices of the academy. A very large audience was present. The speakers were either old students or fellow teachers of this venerable educator. The remarks were illustrative of his life and works,

The school has again attained its normal equilibrium, the events of the last few weeks having disturbed the course of study very much. Most of the stu-dents are anxiously hoping there will be no more vacations for some time,

The 1904's are relateing. Their party given on Washington's birthday one of the greatest events of the seaevening was a reproduction of Liberty cell. This was hung from the dome of room D, and formed a pretty contrast from the national colors surrounding it. The arc lights inclosed in suitable globe resembling the clapper of the bell. The bell was six feet in diameter and about five feet in height, made of bronze and gilt cardboard. Four couple dressed in Washingtonian style danced the old time minuet beneath this emblem of American independence. The bell still adorns the hall.

# BRIGHAM YOUNG COLLEGE.

The basket-ball team of the Salt Lake Business College visited us on Washing-ton's birthday and played an interest-ing game. The result of the game showed the effects of training. The college team did fairly good work the time they had been organized, were not equal to the visitors, score stood twenty-four to fourteen favor of the visiting team. The delight ful feature of the game was the ab-sence of disputes, which often mar the pleasure of such games.

Now that the McMillen bill has become a law a number of students have returned to school and others have made up their minds to settle down to work. Many were preparing to leave rather than submit to vaccination, President Linford, however, has advised all students who are not opposed and whose parents do not object to be vac-

very large attendance not only of this lieve in the compulsory side of the quesclass but also of the various other tion.

Judge Flenner of "The Boise Capital," lectured before the Polysophical Society of the Brigham Young College on Monday evening. His lecture was entitled "Bright and Happy Home." By way of introduction the judge gave a number of readings from J. Whitcomb Riley The whole lecture was a treat to the audience. While Mr. Flenner introduced a number of bright jokes there was a vain of seriousness running through the whole that made the lecture instructive as well as entertaining. The musical features of the entertainment were a duet by Mr. Frank Baugh and Miss Crismon, a soprano solo by Miss Crismon and a piano solo by Miss Beatrice Hoff.

The College authorities are installing a twenty-five horse-power engine and a two hundred and fifty, sixteen candlepower light dynamo, and will hereafter furnish the necessary electricity for lighting the college buildings.

Among the visitors to the business college this week were: Mr. B. W. Ashton, superintendent of schools in Sait derson was highly pleased with what he

Lysander Pond, superintendent of the Sunday schools of Pocatello stake, was a visitor one day last week. Mr. Pond is a graduate of the college.
